Career Aspirations

Reflection on Career Aspirations

My aspiration is to become a graphic designer in a creative and dynamic environment, where my skills are being used to create visually appealing designs. The graphic design industry provides numerous opportunities for personal and professional development, allowing expressing creativity while satisfying the needs of clients and users. To achieve this goal, a specific plan is made that involves completing my university degree to meet the educational requirements for most design roles.

By planning to improve my skills in graphic design, it focuses on areas like mastering design software, understanding design principles, and boosting creativity. By already gaining experience with design software like Photoshop during college courses, with unique assets, effectively get me the highest grade possible. I'm willing to explore additional resources and opportunities to enhance skills in design software, deepen my understanding of design principles, and enhance creativity.

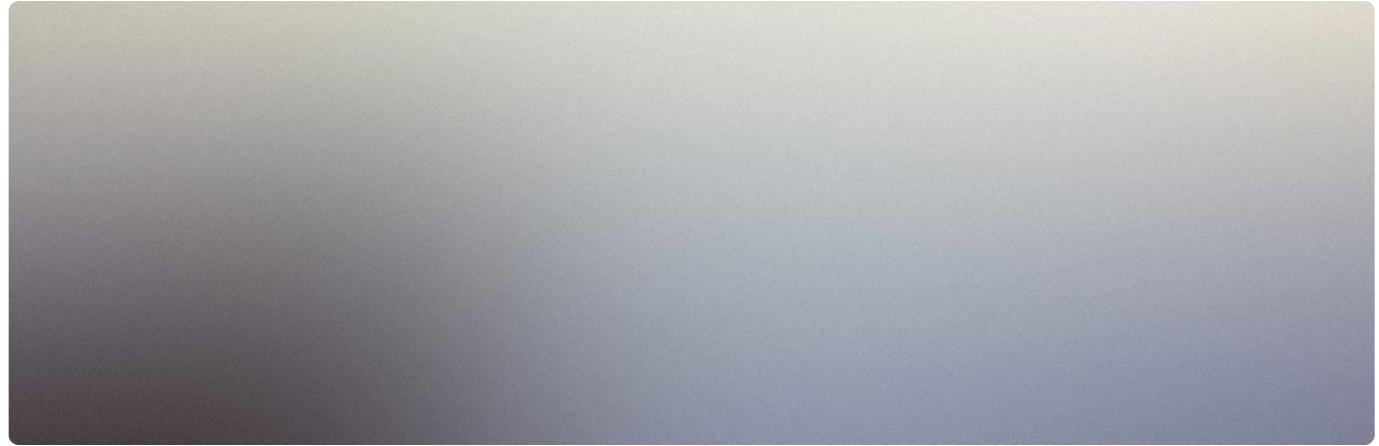

Furthermore, teamwork plays a crucial role in graphic design, as working together with colleagues and clients is essential to completing design projects successfully. Design professionals emphasize the importance of collaboration and effective communication in design teams. To improve teamwork abilities, actively engaging in group projects and seeking opportunities to collaborate with peers is undertaken throughout the module. Through these experiences, one aim is to improve teamwork skills and gain insights from different perspectives within the design community.

Analysis and Evidence of Own Skills

Evidence of Current Skills

Website Design and Development Skills

By being involved in the web team working on the Resolve IT website, greatly expanded my skills as a graphic designer. Learning HTML, CSS, and JavaScript hands-on has given me a solid understanding of web design principles. Now, visually appealing and functional web pages are created by seamlessly blending graphic elements. Additionally, insights were gained into user experience (UX) design, prioritizing usability and functionality in designs. Combining my web design experience with graphic design, the user requirements can be meet easily. With my expertise in cross-platform design and UX principles, user-friendly designs are created across various digital platforms. By combining my HTML, CSS, and JavaScript skills with graphic design, provides designs that effectively connect with users and clients.

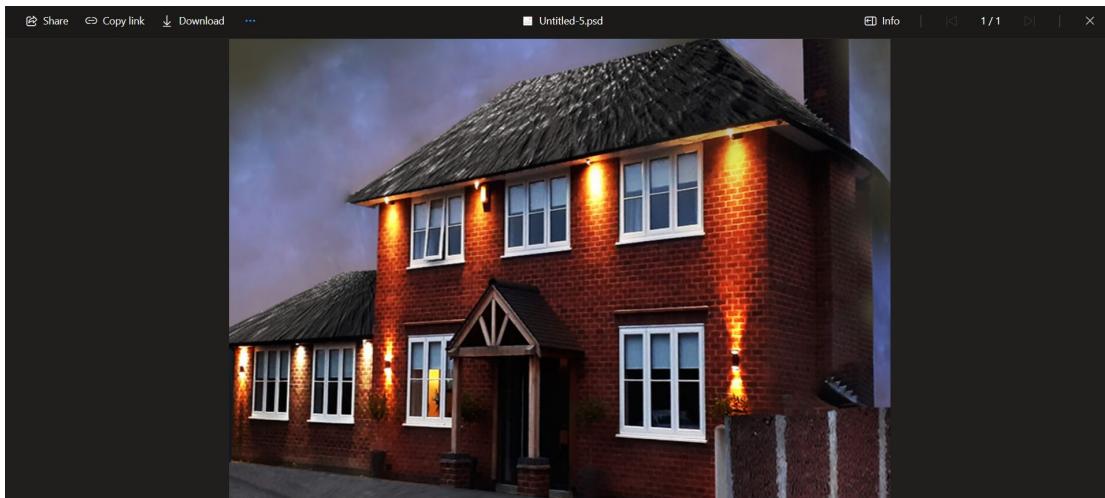

Evidence:

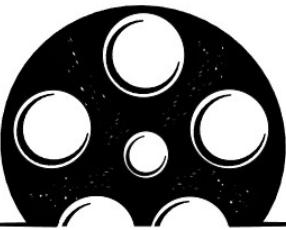

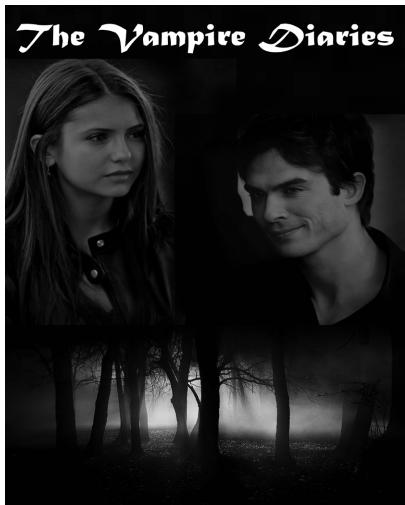

Design Software Skills

By demonstrating my knowledge of design software such as Adobe Photoshop and Illustrator, high quality visuals were made for websites through both coursework and personal projects. Throughout studies, Photoshop was used to complete a variety of assignments, which include simple edits to complex designs. Furthermore, projects allowed me to explore the software, resulting in an in-depth knowledge.

Evidence: Completed design projects include creating logos, posters, and digital illustrations using Adobe Creative Suite. Positive feedback from teachers and peers on the quality and creativity of the designs demonstrates my skills in design software.

Digital Skills

Doing IDEA's Bronze Award has been a good experience, teaching me skills such as technical knowledge of digital devices, and problem-solving techniques. Throughout the activities, it increased my project management skills, improved communication and teamwork skills, and learnt how to give an effective presentation. Overall, the activities taught patience and adaptability, providing me with the attitude needed to face problems and succeed in the field of technology.

Communication and Collaboration Skills

With experience working with others on presentation projects, has taught important lessons about effective teamwork and communication in the workplace. By actively participating in groups, communicating ideas clearly and listen carefully to the suggestions of others was learned. By participating in these group activities, confidence was gained in dealing with various team situations and can contribute more effectively.

Evidence: In a group project for my module, collaboration with team members successfully to develop a presentation based on smart devices in education. Our team received positive feedback from our personal tutor for our professionalism, teamwork, and the quality of our final deliverables.

Portfolio

Knowledge and Skills Development

Skill	Description	Evidence
Presenting skills	<p>These are essential for graphic designers because they enable effective communication with clients, collaboration within teams, pitching design ideas and receiving feedback.</p> <p>Spending 1 hour and 15 minutes on LinkedIn to improve presentation abilities, with a focus on PowerPoint slide design makeover, demonstrates my dedication to professional growth and development.</p> <p>The course taught me essential abilities for giving excellent presentations. This includes the importance of clear communication, organised information and visually appealing design. In addition, managing anxiety was taught and create confidence when speaking. Overall, the course taught me real skills that it can be used to present presentations in professional contexts.</p>	
Photoshop skills	<p>Photoshop skills are essential for graphic designers because they enable image editing, photo manipulation, and ensure compatibility with industry standards.</p> <p>It improved my Adobe Photoshop knowledge and skills by taking the Adobe Certified Associate Photoshop 2019 certification preparation course. Over the course of 3 hours and 33 minutes, advanced Photoshop methods were taught including photo editing, retouching, and manipulation. In addition, the use of Photoshop tools and capabilities were</p>	

also taught to produce professional-quality graphics and designs. Overall, the course improved my Photoshop abilities and enabled to use them successfully in a variety of creative projects.

Time Management skills

Time management is crucial for graphic designers because it allows them to meet project deadlines, prioritize tasks effectively, and maintain productivity.

Essential methods and ways to increase my productivity and better manage my time were highlighted by taking the "Efficient Time Management" course on LinkedIn for 1 hour and 31 minutes. Advantages of planning specific goals in order to focus my efforts on tasks were taught. In addition, the course also focuses on overcoming delays and minimise distractions so that anyone can keep focus throughout the day. Furthermore, the course gave practical advice for organising a calendar, as well as using tools to improve in work. Overall, this course has given me the mindset needed to make better use of time and be more productive.

Project Management skills

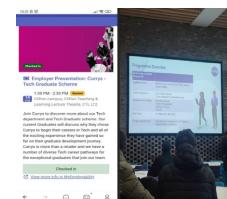

Project management skills are vital for graphic designers as they help oversee projects from start to finish, ensuring they are delivered on time, within budget, and meet client expectations.

Agile project management principles and how to apply them to Microsoft Project was covered through the "Agile Project Management with Microsoft Project" course on LinkedIn, which took 1 hour and 53 minutes. Modifying project management approaches to agile frameworks were highlighted for allowing flexibility, collaboration and response to change. In addition, efficiently planning and managing agile projects with Project were the focus of the course, including sprint planning and iterative development. Furthermore, the course taught me ways to improve team interaction. Overall, this training has prepared me to run agile projects confidently in the future.

Initiative skills

Initiative skills are essential for graphic designers because they promote proactive behaviour, creativity, and self-motivated activity throughout their process.

Attending Currys' presentation, where graduates discussed their experiences and professional journeys, provided an interesting opportunity to think about potential future job options in the IT industry. The presentation focused on a wide range of clients that are available at Currys outside of regular retail jobs, with a focus on technology-related career paths. Hearing from graduates who began their careers at Currys gave great insights into the company's lifestyle and career possibilities. This experience not only raised my awareness of different possibilities for careers, but also encouraged me to investigate Currys as a potential employment for the future in technology.

User Experience (UX) Design skills	<p>User experience (UX) design skills are essential for graphic designers as they focus on creating designs that prioritize the user's needs, preferences, and overall satisfaction.</p> <p>UX design ideas are learned after taking the "UX Foundation: Interaction Design" course on LinkedIn for 3 hours and 28 minutes. The importance of user design was highlighted and how to utilise them effectively to build appealing digital experiences. The course discussed subjects like user research, wireframing and usability, which gave me a good understanding of the UX design. Practical skills were learned in interaction design, such as creating interfaces that prioritise user satisfaction. Overall, this course expanded provided me with the knowledge to build user designs that fulfil the expectations of a wide range of customers.</p>	
Communication & Collaboration skills	<p>Communication and collaboration skills are essential for graphic designers as they facilitate effective interaction with clients, team members, and stakeholders throughout the design process.</p> <p>Efficient team communication and collaboration were learned by taking the "Essentials of Team Collaboration" course on LinkedIn for 32 minutes. The course underlined honest communication for creating collaboration and ensuring team success. Different communication tools and methods were the focus of the course, as well as how to overcome regular communication difficulties. The training also highlighted trust, respect, and confidence within teams to encourage open communication and cooperation. Overall, this course improved my knowledge of the principles of working together.</p>	
Problem Solving skills	<p>Problem-solving skills are crucial for graphic designers as they encounter various challenges and obstacles throughout the design process.</p> <p>Multiple techniques for solving complex issues were taught while taking the "Problem Solving Techniques" course on LinkedIn for 1 hour and 14 minutes. The course taught me about organised problem-solving approaches including basis analysis, planning, and decision-making processes. Identifying issues, explore reasons, develop solutions, and evaluate options were highlighted in this course. The course also highlighted the value of critical thinking. Overall, this training has provided me with strategies that it can be used to face and solve issues in professional and personal settings.</p>	

Organization skills	<p>Organizational skills are essential for graphic designers to effectively manage their workload, meet deadlines, and maintain productivity.</p> <p>Ideas for improving my organisational abilities were learned from the "Improve Your Organisational Skills" LinkedIn course, which it took 1 hour and 34 minutes on. The course covers topics, including time management and workspace organisation. Methods were taught for better managing my schedule, such as making to-do lists, setting reasonable goals, and creating successful routines. In addition, the course taught how to reduce</p>	
---------------------	--	---

distractions and enhance attention. Overall, this experience provided me with knowledge that it can be used to better manage time, activities, and resources, resulting in enhanced productivity.

Creative Thinking skills

Creative thinking skills are fundamental for graphic designers as they enable them to generate innovative ideas, solve design challenges, and produce visually compelling solutions.

Innovative thinking in the design process was taught by taking the "Design Thinking Venture Design" course on LinkedIn for an 1 hour and 3 minutes. The course taught the basics of design thinking and highlighting communication as key elements of the problem-solving process.

Approaching problems from a user view and produce new ideas regularly were the focus of the course. The course also included practical approaches for supporting collaborative creative thinking. Overall, this course has provided me with techniques for improving creativity and developing solutions.

The Principles of Design knowledge

Understanding the principles of design is fundamental for graphic designers as they must create the visual appealing and effective design. Design concepts and how to use them were taught by taking the "Graphic Design Foundations: Layout and Composition" course on LinkedIn for 2 hours and 3 minutes. The course included a review of layout and composition concepts, including balance, alignment and contrast. Applying these ideas to produce well-organized designs in a variety of forms were the focus of the course. The course also highlighted typography, colour theory, and visual structure in improving the impact of graphic designs. Overall, the course provided me with practical abilities for creating attractive products.

Responsive Design skills

Responsive design skills are essential for graphic designers, particularly in the context of web design, as they enable designers to create websites that adapt and respond to different screen sizes and devices. In the "Responsive Layout" course on LinkedIn, which took 2 hours and 32 minutes, the creation of responsive designs that adjust to multiple screen sizes. The course explored strategies for creating flexible layouts were learned. Creating websites was taught in the course, that offer the best viewing experience on PCs, tablets, and mobile, assuring usability and accessibility for users. Overall, the course provided me with practical skills for creating websites that provide a consistent experience across devices and screen resolutions.

Online Marketing knowledge

Online marketing knowledge is crucial for graphic designers as it enables them to create designs that effectively support marketing strategies and goals. Online marketing strategies knowledge was gained after taking the "Building an Integrated Online Marketing Plan" course on LinkedIn for 2

hours and 18 minutes. The course covers internet marketing, such as SEO, content marketing, social media, email marketing, and paid advertising. Developing marketing plans were highlighted that use several channels and methods to reach and engage target consumers successfully. Overall, the course has improved the knowledge of online marketing concepts and of carrying out effective online marketing campaigns for businesses and brands.

Color Theory knowledge	<p>Color theory knowledge is essential for graphic designers as they need need to create visually appealing and effective designs.</p> <p>Concepts and applications of colour theory was taught by taking the "Graphic Design Foundations: Color" course on LinkedIn for an 1 hour and 57 minutes. The course explored principles including colour contrast, saturation, and temperature, giving an understanding of how colour affects visual communication. The use of colour was highlighted to trigger emotions and express messages in design projects. The course also covered approaches for choosing colour palettes and blending colours. Overall, the course provided me with skills to create smooth designs in a variety of design projects.</p>
------------------------	--

Typography skills	<p>Typography skills are essential for graphic designers as typography is a critical role in shaping the visual identity and communication of a design.</p> <p>Optimisation was taught for font for different screen sizes and devices by taking the "Responsive Typography Techniques" course on LinkedIn for 2 hours and 9 minutes. The course covers designing typography that adapts smoothly to multiple viewport widths, ensuring accessibility across all platforms. Flexible typography and responsive font scaling was underlined, which enable font size to change based on screen dimensions. Overall, the course improved the understanding of typographic concepts to develop flexible font designs for digital interfaces.</p>
-------------------	--

Visual Communication skills	<p>These are fundamental for graphic designers as they enable them to effectively convey messages, ideas, and concepts through visual elements.</p> <p>By spending 1 hour and 47 minutes on LinkedIn's "20 Rules for Visual Communication" course, provided the knowledge of the concepts of visual communication. The course looked into the best practices for developing visual designs across several platforms. Concepts like balance and consistency were underlined, which are essential for communicating. The course also included examples that demonstrated how these ideas are in the real-world design projects. Overall, the course provided me with useful resources for creating attractive designs that engage with people.</p>
-----------------------------	--

Adobe Illustrator	Adobe Illustrator skills are essential for graphic designers as it is a vector graphic editor used for creating logos, icons, typography, and other
-------------------	---

skills

scalable graphics.

Helpful knowledge was undertaken into understanding Adobe Illustrator by taking the "Cert Prep: Adobe Certified Associate Illustrator" course on LinkedIn for 3 hours and 46 minutes. The course covers techniques for creating vector graphics and drawings with Illustrator tools and skills. Ideas like shapes, paths and layers were highlighted, as well as working with gradients, patterns, and effects. Overall, the course has increased my skill level in Adobe Illustrator and provided me with the knowledge required to get better at making vector-based art and designs.

Adobe InDesign skills

Adobe InDesign skills are crucial for graphic designers. They use it especially for layout design and publishing tasks. To enhance the Adobe InDesign skills, I joined LinkedIn's "Cert Prep: Adobe Certified Associate InDesign" course for 4 hours and 5 minutes. The course includes all of the basic skills and ways to use InDesign tools to produce professional layouts and publications. Documentation design, text formatting, picture positioning, and layout design principles were the focus of this course. Overall, the course increased my skill level in Adobe InDesign and provided me with the knowledge needed for designing and creating high-quality print and digital publications.

Print Design skills

Print design skills are fundamental for graphic designers as they work on projects intended for printing, such as brochures, posters, business cards, packaging, and more. Principles of print layout and production processes were taught from the "Learning Print Production" course on LinkedIn, which took 1 hour and 23 minutes. The course included print terminology, colour management, and print finish procedures. The significance of resolution, colour modes, and file formats in creating print artwork were underlined, as well as how to ensure print quality. The course also covered strategies for managing print jobs efficiently. Overall, the course provided me with the information to develop print designs that match to industry standards.

Motion Graphic skills

Motion graphics skills are essential for graphic designers as they create animated visual content for digital platforms, including videos, commercials, animations, and interactive media. By spending 2 hours and 4 minutes on LinkedIn's "Motion Graphics for Social Media" course, helpful insights were gained on how to create motion graphics for social media platforms. The course covers animation design, such as motion typography and visual effects. Optimising motion graphics is highlighted, and also is taking into account the aspect ratios, video durations, and file formats. The course also has examples of applying motion graphics to social media campaigns. Overall, the course has improved my motion graphics understanding, allowing me to produce

attractive animations for social media sites.

Confidence skills

Graphic designers often need to present their design concepts and ideas to clients. Confidence enables designers to present their vision effectively, answer questions with authority, and address client feedback with assurance.

Volunteering 1 hour every Sunday to play the piano in front of a big audience at church not only improves my musical ability but also develops important skills for my potential career as a graphic designer. Performing in front of ranged audiences regularly builds confidence and balance, both of which are necessary for effectively presenting design concepts to customers. Furthermore, it creates adaptability by teaching me how to respond to audience emotions. Overall, this experience improved my creativity and expression which can be used in graphic design projects, increasing innovation in my work.

Reflection on Professional Conduct

Reflection

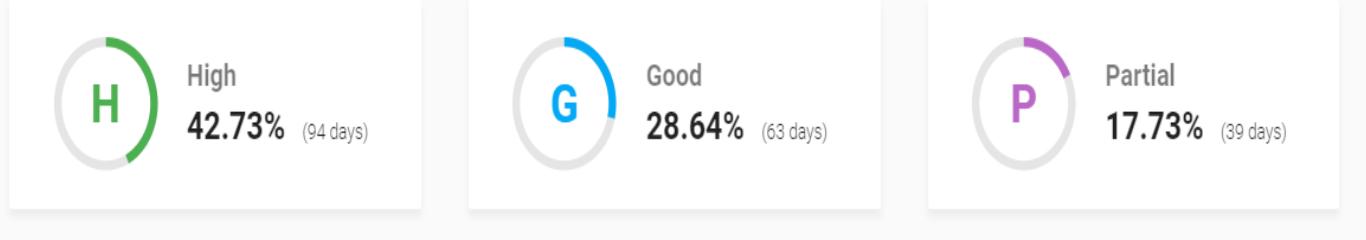

Throughout the module, professionalism in IT conduct was included, bringing inspiration from the BCS Code of Conduct. By making attempts to follow ethical values, it was ensured that integrity, honesty, and responsibility were established. Maintaining the confidentiality of sensitive information has been a primary concern, and data has been handled with extreme caution and discretion. Communication skills were also crucial in encouraging cooperation and knowledge sharing within the team and with others.

Furthermore, it highlighted the importance of balancing student and personal life. Prioritizing self-care and well-being are critical to achieving long-term success and fulfilment of a career. By practicing stress-management measures, setting boundaries, scheduling time to relax and engage in leisure activities outside of the module, will help maintaining a healthy work-life balance and safeguard the overall well-being.

In addition, the value of professional networking and making important connections in the IT world is crucial. By actively participating in industry events, seminars, and online forums helped on expand my network, share expertise, and keep current on industry trends and best practices. LinkedIn was an effective platform for networking with possible role models, and industry leaders. By keeping an active presence on the platform, established to highlight my abilities, experiences, and accomplishments, effectively establishing them within the IT community.

Also, throughout the module, I have shown excellent professional behaviour by constant and motivated participation, as well as good attendance. My dedication to engaging in labs and seminars not only aided my learning but also improved the overall learning experience. By prioritising attendance and engagement, I have demonstrated my commitment to academic and professional growth.

Engagement Breakdown ⓘ

To improve professional conduct, more time will be spent on studying and reflection, both individually and in collaboration with colleagues and mentors. By increasing my knowledge of the ethical components of IT practice and the social impact of technology, I hope to maintain a high standard of professionalism and ethical integrity in my future career.
